PROFESSIONAL SUMMARY

Python/Django developer with 5+ years of freelance experience building backend REST APIs, full-stack web applications, live stock-market analytics platforms, automated web scraping pipelines, AI-powered assistants, and Telegram bots. Experienced in deploying production Django applications on GCP and DigitalOcean with Unicorn, Nginx, and Systemd. Passionate about combining backend engineering with AI (Google Gemini API) and NSE/BSE stock-market data to build real-world automated systems.

TECHNICAL SKILLS

Languages:	Python, JavaScript, SQL, HTML5, CSS3, Bash / Shell
Backend Development:	Django, DRF, Flask, FastAPI, REST API Design, Django ORM, Django Channels, WebSocket / ASGI, Celery, JWT Auth, Djoser, Class-Based Views, Management Commands, API Pagination
Frontend:	Next.js, React.js, React Native, Tailwind CSS, Bootstrap, Responsive UI, Dark/Light Themes, Dynamic Tables, Stock Dashboard UI
Databases:	PostgreSQL, MySQL, SQLite, MongoDB, Redis, Cloud SQL (GCP), Firebase / Firestore, Pandas, NumPy, Time-Series Data
Web Scraping & Automation:	Selenium, BeautifulSoup, NSE Data Scraping, Dynamic Site Scraping, Proxy Config (Smartproxy), Systemd Scheduling, Browser Automation
Stock Market & FinTech:	NSE / BSE Live Data, yfinance, Market Scanners, Gainers/Losers, Volume Shockers, Block Deals, F&O Data, OHLCV, Pre-Open Market, Delivery Positions, Watchlists, Historical Comparison
AI & LLMs:	Google Gemini API, Prompt Engineering, AI Stock Summaries, Telegram Bot API, OCR Integration, Ollama (local LLM)
Cloud & DevOps:	GCP (VM, Cloud SQL), DigitalOcean, Unicorn, Daphne / ASGI, Nginx, Systemd Services, Cron Scheduling, Log Monitoring
Tools:	Git, VS Code, PyCharm, Postman, Jupyter Notebook, Linux, Docker (basics)

PROFESSIONAL EXPERIENCE

Full-Stack Python / Django Developer

Freelance | Feb 2021 - Present (5 years 3 months)

- Built a full-stack NSE stock-market analytics platform (Django, DRF, Next.js, PostgreSQL) featuring live market scanners, gainers/losers, volume shockers, block deals, F&O data, AI summaries, watchlists, and historical comparison tools.
- Developed an AI stock-market assistant using Google Gemini API for NIFTY50 analysis, LTP/volume trend insights, market bias detection, and Telegram-based automated alert delivery.
- Engineered NSE data scraping pipelines with Selenium, BeautifulSoup, and Django management commands - scheduled via Systemd with Smartproxy rotation to collect block deals, gainers, pre-open market data, and delivery positions.
- Built a Telegram bot delivering AI-generated daily market summaries, stock alerts, corporate meeting analysis, and market-hour notifications from live NSE data.

- Deployed production Django apps on GCP (VM, Cloud SQL) and DigitalOcean - configured Gunicorn, Daphne (ASGI), Nginx, Systemd services, cron scripts, and log monitoring.
- Built REST APIs with DRF featuring JWT authentication, pagination, filtering, and serializers consumed by Next.js and React Native frontends.
- Integrated Celery + Redis for async task processing and Django Channels for WebSocket-based real-time stock data delivery.

Speech & Text Analyst

Etech Global Services | Sep 2022 - Jul 2023 (10 months)

- Automated daily performance reporting using text mining and NLP, eliminating manual report preparation.
- Built data models and scorecards for speech analytics; designed data-validation methodologies to improve AI-based campaign analytics accuracy.
- Implemented data quality checks and accuracy metrics for large-scale call-centre campaign datasets.

KEY PROJECTS

NSE Stock Market Analytics Platform

Django | DRF | Next.js | PostgreSQL | Pandas | Selenium | Gemini API | Tailwind CSS

Full-stack platform with live NSE data - market scanners, gainers/losers, volume shockers, block deals, F&O data, AI summaries, watchlists, and historical comparison.

AI-Powered Stock Market Assistant

Python | Google Gemini API | Django | Telegram Bot API | Prompt Engineering

AI assistant for NIFTY50 analysis, LTP/volume trend insights, market bias detection, and automated Telegram alert delivery with prompt-engineered stock workflows.

NSE Data Scraping & Automation System

Python | Selenium | BeautifulSoup | Django | Systemd | Smartproxy

Automated pipelines collecting live NSE block deals, gainers, volume shockers, pre-open market, and delivery positions with proxy rotation and scheduled execution.

Telegram AI Stock Alert Bot

Python | Telegram Bot API | Google Gemini API | Django

Telegram bot for AI-generated daily summaries, stock alerts, corporate meeting analysis, and market-hour notifications from live NSE data.

Production Django Cloud Deployment

GCP | DigitalOcean | Gunicorn | Daphne | Nginx | Systemd | PostgreSQL

Django apps on GCP VM, Cloud SQL, and DigitalOcean with ASGI, Nginx, Systemd, cron-based market scripts, and production monitoring.

Craigslist Search Engine

Python | Django | BeautifulSoup | JavaScript

Django-powered web scraper with real-time price/category filtering UI.

CERTIFICATIONS

- Python Developer
- Data Scientist with Python
- Mastering Django Web Development

- DataCamp
- DataCamp
- Infosys

EDUCATION

Bachelor of Science (Hons.) - Information Technology

Dr. Babasaheb Ambedkar Open University | Aug 2022 - Oct 2025
